

# YARN BRACELET

We can't spin straw into gold, but we can weave yarn into a bracelet! Follow these instructions to create your own Rumpelstiltskin-inspired craft!

1. Pop the knot through the middle of the circle
2. Take a string and put one through a notch. You will have 1 empty notch
3. Find your empty notch and count 3 spaces over.
4. Take that string out and move it to the empty slot.
5. Find the new empty notch and count 3 spaces over. Repeat process of moving string to the empty slot.
6. Eventually, a bracelet will begin to form underneath. Pull it through and keep crossing string until you get to the end of the yarn.
7. Once long enough, take off the cardboard and tie onto your wrist or ankle!

*Cardboard piece is cut out with slits and hole in the middle.*

*Yarn is tied together with a knot on one end.*
