

Spiral Beanstalk Paper Craft

You will need:

- Glue
- Scissors
- Pencil or paper clip
- Crayons/Markers
- A piece of yarn or string

Directions:

1. Color both sides of the spiral page and then cut it out to be your beanstalk.
2. Color both sides of the leaves page and then glue them on your beanstalk. Print more than one copy of the leaf page if you want, or use your cut-outs to trace like a stencil.
3. Poke a hole in the middle of the spiral (on the black dot; use a pencil point or a paper clip point), and then run a piece of yarn through the hole, making a loop.
4. Hang your beanstalk by the loop. Just don't try to climb it!
