

Clothespin Shark

You will need:

- Shark puppet template
- A clothespin (be sure to ask your adult before taking one from the laundry area!)
- Glue or tape
- Scissors

Directions

1. Color all the pieces below except the triangular teeth.
2. Cut out all the parts, and cut the line down the middle of the shark, so he can open his mouth.
3. Glue the teeth to the back side of the body at the mouth end of the shark, so that they will show when he opens his mouth.
4. Glue the pieces together as the picture shows, and tape or glue the shark pieces to the side of the clothespin.

When you open the clothespin, the shark will open his mouth!
