

Spider Doorhanger

You will need:

- Crayons, markers, or colored pencils
- Spider template
- Scissors
- Glue or tape
- Paper (optional)
- googly eyes (optional)

Instructions:

1. Color all the shapes on the spider template, leaving the fangs (the triangles) white.
2. Cut them out, making sure you keep the semi-circles where the two sets of legs come together still slightly attached.
3. Glue them on like in the picture.
4. Draw some circle paper eyes to attach to the spider above the fangs, or use googly eyes.
5. Now Anansi can hang out with you by hanging from your doorknob this summer, or you can glue him to paper instead!
