

ARCHERY WITH ARTEMIS

- Color the Minotaurs and fold each page along the dotted line. Notice one will stand taller than the other.
- Stand the Minotaur up on a flat surface so that he's a still and stable target.
- Using the miniature bow and arrows in your To-Go Kit*, practice your archery skills. Which Minotaur is easier to knock over? Did the height of the target make a difference?

*If you did not receive a mini-bow and arrow set or would like to make more, you can find instructions at: www.instructables.com/id/How-to-Make-a-Mini-Bow-and-Arrows/
